## R-PANEL SHEETING

**Quality Guaranteed**

Our R-Panel sheeting system is both durable and streamlined, with a modern appearance suited for any building design. Rated the number one choice for many residential home owners, this sheeting is the most cost effective product on the market today. With even a basic understanding of roofing the installation procedure is rudimentary allowing for quick and easy installation. However, utilising a professional installer guarantees a finish of high standard.

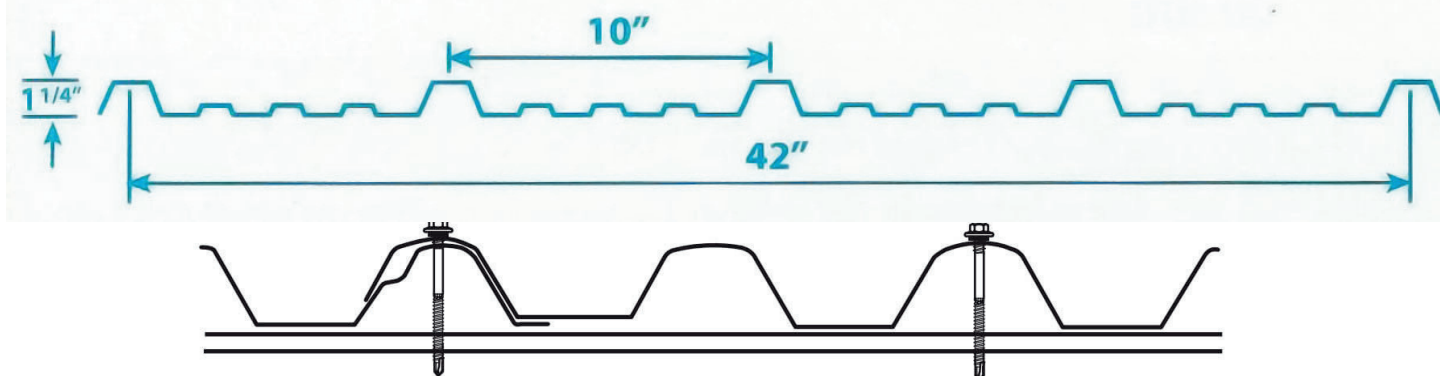

### Material Specification

The base material consist of an aluminium zinc alloy that is bonded onto a steel substrate through a hot dipping process and is available in 28, 26 and 24 gauge. There are three different paint finishes offered silicone polyester, polyvinylidene fluoride (PVF2) and Kynar 500. Kynar 500 paint finish formulated with seventy percent (70%) fluorocarbons offers greater protection than other paints against the sun's ultra violet light that causes early deterioration. Custom materials such as .032 & .040 aluminum are available on request.

### Advantages:

- ✓ Long lasting beauty and durability
- ✓ Easy installation
- ✓ Aesthetically pleasing in pre-painted or aluzinc finish
- ✓ Economically priced

### COVERAGE - 40"
