

• Durable • Streamlined • Modern

ROOF - IT

Our **R- panel** sheeting system is both durable and streamlined, with a modern appearance suited for any building design. Rated the number one choice for many residential home owners, this sheeting is the most cost effective product on the market today. With even a basic understanding of roofing the installation procedure is rudimentary allowing for quick and easy installation. However, utilising a professional installer guarantees a finish of high standard.

Material Specification

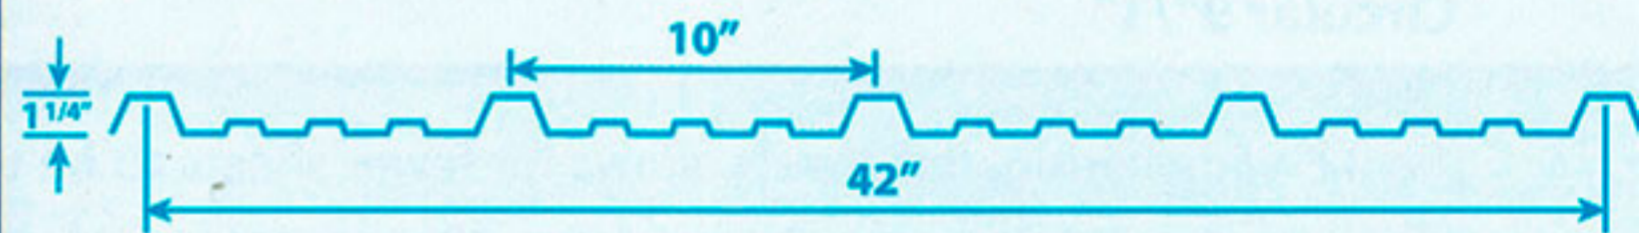

The base material consist of an aluminum zinc alloy that is bonded onto a steel substrate through a hot dipping process and is available in 28, 26 and 24 gauge. There are four different finishes offered silicone polyester, polyvinylidene fluoride (PVF2), kynar 500 and mill finish. Kynar 500 paint finish formulated with seventy percent (70%) fluorocarbons and twenty five percent (25%) nominal gloss offers greater protection than other paints against the sun's ultra violet light that causes early deterioration. Custom materials such as .032 & .040 aluminum are available on request.

Advantages of using R-Panel sheets:

- Long lasting beauty and durability
- Economically priced
- Easy installation
- Energy efficient due to its reflectivity
- Aesthetically pleasing in pre-painted or Aluzinc finish

RATED NO. 1

COVERAGE - 40"

Thickness <i>British Wire Gauge</i>	Recommended Maximum Purlin Spacing <i>Inches</i>	Weight Per Foot <i>Lbs</i>	Sheet Length <i>Feet</i>
